Features of Model RTH:

- Safety light and back-up alarm warns others when in use
- Covers open on either side for ease in loading from both sides of the Curb Runner
- Hydraulic cylinders raise compartments individually to a maximum unloading angle - completely removing recyclables
- Smooth interior eliminates any hang-up of recyclables
- Easy to operate control box makes raising or lowering compartments smoothly to any desired position

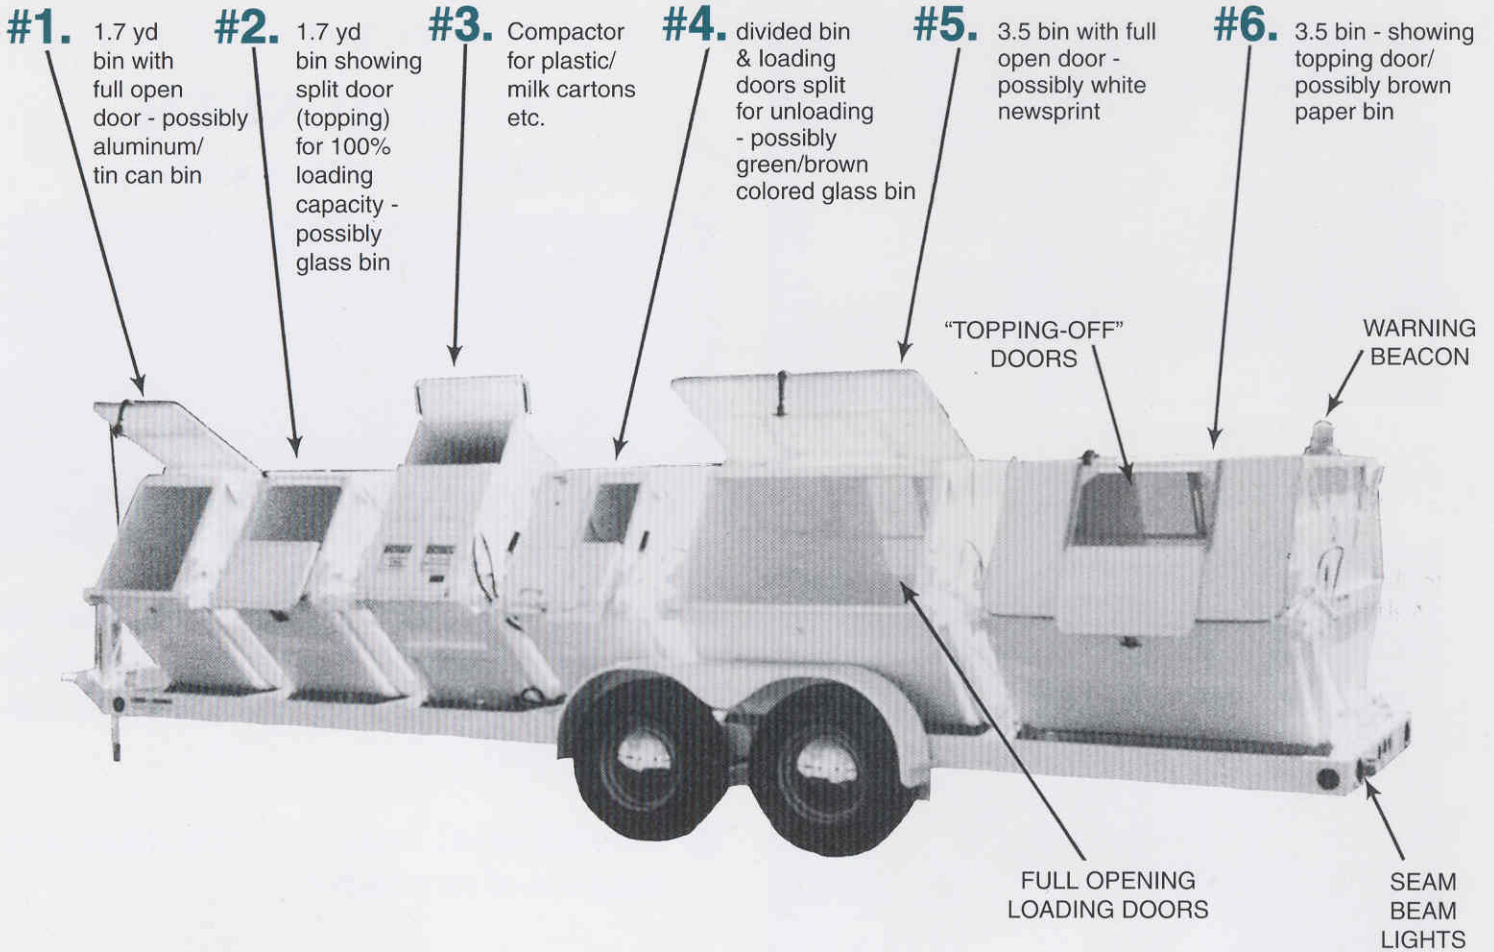

Features of Model RTG/RTGA

- Adjustable, 3 positions for metering if needed
- Single point action to release lock pins
- Spring loaded self locking pins
- Sloped floor for easy unloading
- Individual compartments can be unloaded separately
- All aluminum body and floor, easy to wash out, will not rust or corrode from wet, sticky recycled items
- Large loading openings
- Covers flip down safely out of the way
- Design allows for 100% loading capacity
- Low loading height makes unit user friendly
- Separate bins make sorting simple
- Large unloading doors for off loading
